Congratulations on purchasing your new AED!

Thank you for your role in helping improve public safety in New Hampshire. Research confirms that an AED device can significantly improve the chance of survival with a patient experiencing a sudden cardiac arrest. AEDs save lives!

It is critical to make AEDs accessible in emergencies and NH state law (RSA 153-A:33) requires owners to register their devices with the Department of Safety within 30 days of acquisition. By registering new devices, it ensures AEDs will be accessible in emergencies and enables our 9-1-1 dispatchers to accurately direct callers to a nearby AED.

Registering your new AED is simple and convenient online via the PulsePoint website. Visit [PulsePoint Registration Page](https://aedregistry.pulsepoint.org) (<https://aedregistry.pulsepoint.org>) to register your AED. PulsePoint also has an app that allows you to register AEDs easily from your phone as well. Learn more about the PulsePoint app at [PulsePoint | Next Generation AED Registry](http://www.pulsepoint.org/pulsepoint-aed) (www.pulsepoint.org/pulsepoint-aed).

IMPORTANT REGISTRATION INFORMATION

Once an AED is registered via PulsePoint you cannot make changes to the information for that AED registration. You must submit edits to aed@dos.nh.gov. Please put "AED Change" in the email subject line and in the body of the email include the address and serial number for the AED that needs updating.

If you have any questions in regards to registering your AED, please give us a call at (603) 271-6911.
